

WORKSHEET 1 SQL

Q1 and Q2 have one or more correct answer. Choose all the correct option to answer your question.

1. Which of the following is/are DDL commands in SQL?
D) ALTER
2. Which of the following is/are DML commands in SQL?
A) Update B) Delete

Q3 to Q10 have only one correct answer. Choose the correct option to answer your question.

3. Full form of SQL is:
B) Structured Query Language
4. Full form of DDL is:
B) Data Definition Language
5. DML is:
A) Data Manipulation Language
6. Which of the following statements can be used to create a table with column B int type and C float type?
D) All of them
7. Which of the following statements can be used to add a column D (float type) to the table A created above?
B) Alter Table A ADD COLUMN D float
8. Which of the following statements can be used to drop the column added in the above question?
B) Alter Table A Drop Column D
9. Which of the following statements can be used to change the data type (from float to int) of the column D of table A created in above questions?
B) Alter Table A Alter Column D int
10. Suppose we want to make Column B of Table A as primary key of the table. By which of the following statements we can do it?
C) Alter Table A Add Primary key B

Q11 to Q15 are subjective answer type questions, Answer them briefly.

11. What is data-warehouse?
 12. What is the difference between OLTP VS OLAP?
 13. What are the various characteristics of data-warehouse?
-

14. What is Star-Schema??
15. What do you mean by SETL?

Q11 to Q15 Answer

11. A data warehouse is a central repository of information that can be analyzed to make more informed decisions. Data flows into a data warehouse from transactional systems, relational databases, and other sources.
12. there are two types of data processing systems: online analytical processing OLAP and online transaction processing OLTP.
